DIPLOMAT DENTAL SOLUTIONS	**Change description:** **New Diplomat Connect iOS app version 1.7.3**	**Change is valid for:** Model Pro 500/600/700/800	**Technical information No.: 024**
		Change is valid from: **8/1/2025**	**Revision:**

New Diplomat Connect iOS app version 1.7.3

Dear valued customer, we would like to inform you of a new update to our **Diplomat Connect** app on iOS devices.

The new app version **1.7.3** has fixed the issue of previous version **1.7.0** which could have cause the Dentist profile to be save incorrectly on the server and, as a result the data was not downloaded when connecting to the unit.
The update also fixed the **Dmetec Instrument screen, Double Work Error Translation, Quick Program Selection missing** and adjusted the water bottle to the correct amount of **1300ml** instead of the **1500ml**.
The update adds the new **Diplomat Dental Light** functionality and **Preset Timers.**

To automatically update the app you can turn on the auto-update function in you iOS Table in the following menu as shown in the picture.

If you have any questions regarding this technical information or any other topic, please submit a ticket through our official **ticket.diplomat-service.com** website.

Thank you,

Diplomat Dental Solutions Team.
